4. Please provide any additional information about the information provided above:

The Basic Skills requirement for entry into an educator preparation program is waived for any student admitted on or before June 30, 2021 as written into law by the passing of Act 136 of 2020. Act 55 of 2022 signed into law on July 8, 2022, requires the Secretary of Education to waive the requirement to satisfactorily complete the assessment of basic skills required under section 1207.3 and 22 Pa. Code § 49.18(c) (relating to assessment) for 3 years from July 8, 2022 through July 8, 2025. This applies to all students who enter preparation programs during this period as well as otherwise qualified candidates for licensure who make application during this period.

Teachers Prepared

On this page, enter the number of program completers by the subject area in which they were prepared to teach, and by their academic majors. Note that an individual can be counted in more than one academic major and subject area. For example, if an individual is prepared to teach Elementary Education and Mathematics, that individual should be counted in both subject areas. If no individuals were prepared in a particular academic major or subject area, you may leave the cell blank. Please use the "Other" category sparingly, if there is no similar subject area or academic major listed. In these cases, you should use the text box to describe the subject area(s) and/or the academic major(s) counted in the "Other" category.

If your IHE offers both traditional and alternative programs, be sure to enter the program completers in the appropriate reports. For the traditional report, provide only the program completers in traditional programs within the IHE. For the alternative report, provide only the program completers for the alternative programs within the IHE.

After entering the teachers prepared data, save the page using the floating save box at the bottom of the page.

Teachers Prepared by Subject Area

Please provide the number of teachers prepared by subject area for academic year 2023-24.

For the purposes of this section, number prepared means the number of program completers. "Subject area" refers to the subject area(s) an individual has been prepared to teach. An individual can be counted in more than one subject area. If no individuals were prepared in a particular subject area, please leave that cell blank. ([§205\(b\)\(1\)\(H\)](#))

What are CIP Codes?

No teachers prepared in academic year 2023-24

If your program has no teachers prepared, check the box above and leave the table below blank (or [clear responses already entered](#)).

What are CIP codes? The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985, 1990, and 2000 (<https://nces.ed.gov/ipeds/cipcode/Default.aspx?y=55>).

Teachers Prepared by Academic Major

Please provide the number of teachers prepared by academic major for academic year 2023-24. For the purposes of this section, number prepared means the number of program completers. "Academic major" refers to the actual major(s) declared by the program completer. An individual can be counted in more than one academic major. If no individuals were prepared in a particular academic major, please leave that cell blank. ([§205\(b\)\(1\)\(H\)](#))

Please note that the list of majors includes several "Teacher Education" majors, as well as several noneducation majors. Please use care in entering your majors to ensure education-specific majors and non-education majors are counted correctly. For example, if an individual majored in Chemistry, that individual should be counted in the "Chemistry" academic major category rather than the "Teacher Education–Chemistry" category.

Program Assurances

THIS PAGE INCLUDES:

>> [Program Assurances](#)

Respond to the following assurances. Teacher preparation programs should be prepared to provide documentation and evidence, when requested, to support the following assurances. ([§205\(a\)\(1\)\(A\)\(iii\)](#); [§206\(b\)](#))

Program Assurances

Note: This section is preloaded from the prior year's IPRC.

1. Program preparation responds to the identified needs of the local educational agencies or States where the program completers are likely to teach, based on past hiring and recruitment trends.

- Yes
 No

2. Preparation is closely linked with the needs of schools and the instructional decisions new teachers face in the classroom.

- Yes
 No

3. Prospective special education teachers are prepared in core academic subjects and to instruct in core academic subjects.

- Yes
 No
 Program does not prepare special education teachers

4. Prospective general education teachers are prepared to provide instruction to students with disabilities.

- Yes
 No

5. Prospective general education teachers are prepared to provide instruction to limited English proficient students.

- Yes
 No

6. Prospective general education teachers are prepared to provide instruction to students from low-income families.

- Yes
 No

7. Prospective teachers are prepared to effectively teach in urban and rural schools, as applicable.

- Yes
 No

8. Describe your institution's most successful strategies in meeting the assurances listed above:

The training provided responds to the identified needs of local educational agencies or the state through candidate field work in surrounding school districts. Lesson plans are taught, developed, and implemented based upon state standards in four essential categories/domains. Lesson plans and field placements are consistently evaluated by the educator preparation programs. Furthermore, the training provided is closely linked with the needs of schools and the instructional decisions new teachers face through ongoing and consistent planning of modifications, adaptations, and accommodations of different student learners. Candidates encounter a wide range of students during a variety of field experiences in the surrounding area school districts. Special education double majors must, in addition to the 30-hour special education core, complete requirements of the eleven general education programs with which they dual. Further, all general education majors must complete three hours of coursework to prepare for working with students with

limited English proficiency (LAN/ENG 382) and nine credits of coursework to prepare for addressing the needs of students with exceptionalities in the inclusive classroom. The nine credits are divided into five credits (EDA 103 and EDA 303) taught by Special Education faculty and four credits taught by other departments (Literacy and Educational Foundations & Policy Studies). Due to the variety of field placements in urban, suburban, and rural school districts, candidates have specific opportunities to work in schools with high levels of students participating in Title I, and free and reduced lunch programs.

Annual Goals: Mathematics

Each institution of higher education (IHE) that conducts a traditional teacher preparation program (including programs that offer any ongoing professional development programs) or alternative route teacher preparation program, and that enrolls students receiving Federal assistance under this Act, shall set annual quantifiable goals for increasing the number of prospective teachers trained in teacher shortage areas designated by the Secretary or by the state educational agency, including mathematics, science, special education, and instruction of limited English proficient students.

4. Description of strategies used to achieve goal, if applicable:

5. Description of steps to improve performance in meeting goal or lessons learned in meeting goal, if applicable:

The program faculty plan to work with Admissions to determine the best ways to reach potential teacher candidates from diverse backgrounds. The faculty implemented teaching interest events with high school students in mathematics through the WCU College of Education and Social Work's PRIZE program. They are working on potential internship opportunities for first year students to consider teaching at the secondary level.

2. Describe your goal.

The program plans to add 12 prospective science teachers.

3. Did your program meet the goal?

- Yes
 No

4. Description of strategies used to achieve goal, if applicable:

We had a total of 12 prospective science teachers enter the program last year: 10 undergraduate students and 2 graduate students. The graduate students were recruited through the WISER (Noyce Track 2) grant program. One of the things that we believe helped with the undergraduate recruiting is that the program director attended prospective student events in the fall to talk with interested students.

5. Description of steps to improve performance in meeting goal or lessons learned in meeting goal, if applicable:

6. Provide any additional comments, exceptions and explanations below:

One thing that should help with recruitment for next year is having space for an additional cohort with the WISER grant, this space will provide scholarships for up to 5 STEM-focused teacher candidates in the master's program.

2. Provide a description of the evidence that your program uses to show that it prepares teachers to integrate technology effectively into curricula and instruction, and to use technology effectively to collect, manage, and analyze data in order to improve teaching and learning for the purpose of increasing student academic achievement. Include a description of the evidence your program uses to show that it prepares teachers to use the principles of universal design for learning, as applicable. Include planning activities and a timeline if any of the four elements listed above are not currently in place.

Our teacher education programs believe the best way to prepare candidates for technology connected teaching is to have them experience it. We believe a professional educator appropriately integrates technology for instruction. Examination of course syllabi reveal technology use (e.g., Desire 2 Learn [D2L]). D2L has integrated tools to collect and measure data (i.e., grades). Many syllabi also address the integration of assistive technology to teach specific content areas, such as health activities, or to show the different levels of technology available. Candidates use Anthology's Portfolio in teacher education programs to capture assessment data. Technology use is evaluated on Educator Preparation Provider (EPP) assessments (e.g., lesson plan, Skyfactor Benchworks Teacher Education Exit Assessment, alumni survey). In 2019-2020, the EPP first administered a technology rubric to mentor teachers to evaluate the ability of our student teachers to integrate technology within the curriculum. This assessment is aligned with the International Society for Technology in Education Standards for Educators (ISTE) and the Danielson Framework for Teaching. The Council for Professional Education's Assessment and Accreditation Committee updated and validated the rubric. The EPP used the rubric again during the 2023-2024 academic year. Our Director of Instructional Design and Technology assists faculty with designing and developing online courses using the ADDIE model (Analysis, Design, Development, Implementation, and Evaluation) and incorporating Universal Design for Learning (UDL) principles into course design. Courses are designed over a 6–12-month period with the long-term goal of obtaining Quality Matters Online Course Certification. The focus of the design process is on ensuring the alignment of course objectives to course activities and assessments so the course can pass the certification review when it occurs. Technology selected for use in online courses introduces students to technology commonly utilized in PK-12 classrooms. Active learning classrooms within the College of Education and Social Work give candidates the opportunity to participate in a 21st-century classroom active

learning pedagogy. Each pod includes a digital display where faculty can project or ask candidates to project. Candidates and faculty can connect wirelessly to the display. Faculty members who would like to teach in an active learning classroom have the opportunity to work one-on-one with the Director of Instructional Design and Technology or the Technology Center Director for instructional design and technology coaching in both technology and pedagogy for active learning classrooms. Faculty are encouraged to conduct research based on their teaching methods in active learning classrooms.
