I. Introduction

Letter from Chairperson

August 2023

Dear Nursing Students,

On behalf of the Nursing Faculty and Staff at West Chester University, we would like to welcome you to our Nursing Program. We are excited to have you on campus. You were exceptional applicants who have chosen to pursue your baccalaureate education at West Chester University. Welcome!

This student handbook will guide you over the next four years to the Department of Nursing policies and procedures that are critical to your success in the program. This handbook provides information which helps you to navigate efficiently through the nursing program requirements. Also, the handbook contains activities and clubs associated with the nursing major. The Department has a variety of opportunities for you to become involved socially, academically, and professionally. These opportunities include Pennsylvania Student Nurses' Association (SNAP), Xi Delta Chapter of Sigma Theta Tau International Honor Society, and peer mentoring and tutoring.

The Department welcomes students to attend and participate in select Nursing meetings. Student input is welcomed and valued. Student input is a key component for course and program improvement. Student input is critical to the University's Strategic Plan, the Department's Systematic Evaluation Plan and ongoing accreditation processes.

Each student has been assigned a nursing advisor to assist them to navigate the nursing curriculum and program at West Chester. Advisors help guide students to take the correct courses for the nursing major but encourage students to take courses that interest them. Students are encouraged to maintain a relationship with their advisors throughout their time at West Chester.

Please note that our Department's purpose, mission and philosophy is to help each student succeed at West Chester. Nursing faculty and staff look forward to meeting each of you. Our collective goal is that you are prepared to pass your nursing boards on the completion of this highly acclaimed program. Again, a warm welcome and I am so glad that you have joined us at West Chester!

Please feel free to reach out if I can help you during your time at WCU.

Rams Up!

Dr. Nancy Barker, Ed.D, MSN, RN
Associate Professor
Chair, Department of Nursing
West Chester University of Pennsylvania

II. Nursing Program

Purposes

The purposes of the West Chester University baccalaureate-nursing program are:

1. To prepare baccalaureate registered nurses for clinical practice.
2. To develop the ability to function as a self-directed professional capable of assuming leadership in present and emerging health care roles.
3. To enhance personal responsibility for being a useful, contributing member of society.
4. To encourage the continuing process of personal development.
5. To provide the basis for graduate study and lifelong learning.

Mission and Philosophy Statements

MISSION

The mission of the West Chester University Department of Nursing is to provide the highest quality of undergraduate and graduate nursing education to students who come from diverse populations. All graduates are prepared to provide evidence-based quality nursing care, and to become nursing leaders within the nursing profession. The baccalaureate program provides the art and scientific foundations of entry into nursing practice. The graduate programs provide preparation into advanced nursing practice and education roles; thereby, giving students the ability to synthesize knowledge, strengthen communication, and empowerment to promote health care. The Doctor of Nursing Practice program further prepares advanced practice nurses at the highest level to fully evaluate and contribute to increasingly complex health care systems. These contributions are based on contemporary nursing science, organizational, political, cultural and economic principles. Graduates of these nursing programs will be professionals capable of assuming leadership in present and emerging health care roles, citizens who contribute to society and who are committed to life-long learning and personal development.

PHILOSOPHY

The Department of Nursing affirms the WCU Vision, Mission and Values Statements and the College of Health Sciences Mission Statement. It shares the University's commitment to teaching, research, and service to individuals, families, communities and populations. The following statement reflects the Department of Nursing's philosophical beliefs.

The Department of Nursing recognizes that individuals, families, communities and populations are entitled to optimum health and quality health care. Nurses play an integral role in health promotion, disease prevention and enhancing the quality of life throughout the lifespan. According to the ANA "nursing is the protection, promotion and optimization of health and abilities, prevention of illness and injury, alleviation of suffering through the diagnosis and treatment of human response and advocacy in the care of individuals, families, communities and populations." Advanced practice nursing roles include expert clinician, educator, researcher, consultant and leader. The nursing programs at West Chester University recognizes the responsibility to provide innovative educational programs that reflect the growing needs and current trends of diverse populations.

The faculty of the Department of Nursing provides a caring and supportive environment while respecting the diversity of the student body and communities which it serves. The University community cultivates and supports faculty/student collaboration and mentoring. The students are treated as individuals with unique qualities and learning needs. Through professional actions, the faculty reflects the department's philosophy of excellence in nursing practice, creation of evidence-based research, establishing strong interdisciplinary associations and fostering supportive relationships with colleagues, students and the community.

The 2021 AACN *Essentials* document (*The Essentials: Core Competencies for Professional Nursing Education*), provide structure for the curriculum content of all programs. The faculty

designed all programs to facilitate the students' abilities to creatively respond to a continuously changing health system. Innovative educational experiences are cooperatively planned to meet the needs of both the students and clients empowering them in the nursing-client partnership. The interpretation, development and implementation of ethical evidence-based research are stressed throughout the educational process.

Ethical decision making, accountability, critical thinking, and effective *communication* skills are emphasized. This is achieved by the application of nursing theory and empirical evidence to professional practice. All programs promote lifelong learning, leadership, and prepare the student for advance professional degrees or post-doctoral studies.

	2023

Conceptual Framework

The nursing curriculum utilizes a holistic caring model for the study of person, environment, health, and nursing. The horizontal and vertical strands serve to organize content around multiple theories and concepts that have been drawn from physical, psychological, cultural, social, and nursing sciences.

Five horizontal strands can be identified in all the nursing courses. They include: the holistic person adapting throughout the life cycle; the nursing process; nursing theory; legal- ethical issues; and teaching-learning principles. A description of the way each is implemented follows:

- **The holistic person adapting throughout the life cycle.** While moving through the life span, one adapts continuously to internal and external stimuli. The understanding of adaptational responses is basic to the students' knowledge and professional practice.
- **The nursing process.** Students use the nursing process to assess, plan, intervene, and evaluate the responses of assigned clients. Course objectives describe the depth to which the students utilize the nursing process.
- **Nursing theory.** Through academic and clinical assignments, students learn to apply nursing theory to professional practice, and analyze the quality of care provided with emphasis on relationship based care.
- **Legal-ethical issues.** These issues are an inherent part of all professional nursing practice. Inclusion of the legal- ethical dimension of nursing in all courses encourages values clarification, fosters accountability, and enhances decision- making.
- **Teaching-learning principles.** An understanding of teaching-learning principles is fundamental to the provision of health care. Students learn to apply skills of counseling, therapeutic communication, and health promotion in increasingly complex situations.

The vertical strands which provide structure to the curriculum are:

- **Health status** - wellness to less well to crisis
- **Focus of care** - prevention to health promotion to restoration
- **Recipient of care** - individual to family to community
- **Provider of care** - Relationship Based Care
- **Leadership role** - collaboration to coordination to management
- **Research application** - need identification to information gathering to information analysis

The *health status* strand focuses on the client's adaptive responses to stress. The student applies knowledge, psychomotor skills, and attitudes learned in the care of well/less well clients to the care of clients in crisis situations. Emphasis is also placed on the students' ability to evaluate personal reactions to increasingly complex nursing process operations.

The *focus of care* strand guides students first to develop strategies to prevent maladaptive responses and to promote health with well and less well clients. Students build on that foundation in assisting clients in crisis to restore health.

The *recipient of care* strand refers to the client. The initial focus on the individual gradually enlarges to families and the wider community.

The *provider of care* strand structures the growth of the student away from dependence on the assistance of faculty to a degree of independence in providing care, and then progresses to interdependence among members of the health team.

The *leadership role* strand describes the relationship between the student and members of the health team. Initially the student collaborates while using the nursing process, and subsequently coordinates the plan of care with other members of the team. The student progresses in learning and utilizing management skills to advocate and to influence change.

The *research application* strand describes the process with which students use nursing research as a basis for nursing practice. The identification of the need for nursing research to underlie clinical practice is followed by a review of the research literature in order to apply findings to clinical practice. To further develop skill in the use of the research process, students identify clinical problems and critique research for its applicability.

NSG 101 - INTRODUCTION TO NURSING

1 credit hour

This course will introduce the student to knowledge of the nursing process, and the nursing profession. Emphasis is placed on the exploration of the conceptual and philosophical basis of nursing, and the role of critical thinking using the nursing process. This course will identify the relationship of historical events to the application of current nursing practice, and the implication that legal and ethical issues have on the nursing profession.

- **Although the nursing course descriptions have been separated between theory and clinical components for clarity, students must take the theory and clinical components concurrently at all times.**

NSG 212 – FUNDAMENTALS OF NURSING PRACTICE

3 credit hours

In this course the student will examine various nursing theories and concepts; conceptual frameworks; theories from other disciplines which apply to nursing; nursing history; nursing education; professionalism in nursing; nursing leadership; the nursing process; nursing diagnosis, nursing research; ethical, legal, economic, and political aspects of nursing and current issues in nursing. The student will also study and learn to practice psychosocial and physical assessment skills as well as learning how to do: vital sign assessment, provide bedside nursing care, hygiene and comfort; transfer and positioning techniques for clients, and understand and demonstrate competence in the utilization of standard precautions as a health care provider. This course is a prerequisite for NSG/NSL311, and serves as a foundation for all subsequent nursing courses in the upper division.

PRE-REQUISITES: NSG 101. Composite GPA of ≥ 2.75 in the following courses: BIO 100; BIO 259&269; CHE/CRL 107

NSL 212 - HEALTH ASSESSMENT AND THE FUNDAMENTALS OF NURSING

3 credit hours

(Must be taken with NSG 212). This clinical experience includes interviewing skills, physical and psychosocial assessment, vital signs measurement, basic hygienic practices, body mechanics, and infection control. Students are required to take a Nursing Lab Practical Exam at the end of this course.

NSG 310 - HUMAN RESPONSE TO DISEASE

3 credit hours

Examination of core concepts of alterations of human responses to disease processes at the cellular and systemic level. This course focuses on illness as it affects major body systems. Students will identify and analyze prototypical clinical situations, which will provide a foundation for their nursing practice. This course will link clinical situations to their underlying mechanism of disorder and provide a sound knowledge for the practice of professional nursing.

PRE-REQUISITES: Completion of BIO 259 & 269 with a final grade of at least 70%.

NSG 311 – NURSING CARE OF WOMEN, INFANTS, & CHILDREN

4 credit hours

The emphasis of this course is the childbearing family and the pediatric patient. Content will focus on prevention of illness and promotion of health by assessment of the health status, appropriate intervention, and evaluation of the health promotion plan. Chronic states as well as acute health conditions will be addressed as well. Content is organized around the concepts of wellness, chronicity and acuity. The nursing process provides the framework for the care to be given in a variety of settings with clients. NSG 311 and NSL 311 must be taken concurrently.

NSL 311 Laboratory: Clinical experiences are provided in agencies where relatively well populations have been identified, as well as acute care population settings. Examples include schools, primary care practices, inpatient settings, and childbirth settings. NSG 311 and NSL 311 must be taken concurrently, 5 credit hours.

PRE-REQUISITES:

NSG 101, NSG 212, NSL 212 (both NSG/NSL with a 73% or above). WRT 120-200, NTD 303, BIO 204, NSG 310 (with a 73% or above), PSY 100, SOC 100 or 240, and PSY 210 or HEA 206 (all with 70% or above).

***NSG 312 – INTRODUCTION TO MEDICAL SURGICAL NURSING AND
CARE OF THE ELDERLY***

5 credit hours

The emphasis of this course is on the assessment, maintenance, and promotion of health of the older adult and introduction to the care of the inpatient. Clients with chronic health problems in both these populations are addressed. Content is organized around the concepts of wellness, chronicity and acuity. The nursing process is used to assist these clients to grow and or adapt through supportive, therapeutic, palliative, and preventive measures. NSG 312 and NSL 312 must be taken concurrently.

NSL 312 Laboratory: Clinical experience is provided in rehabilitation centers, nursing homes, and acute care settings. These environments provide flexibility for students to implement changes for clients and acquire skills, which will be utilized in other nursing courses. NSG 312 and NSL 312 must be taken concurrently, 5 credit hours.

PRE-REQUISITES: NSG 101, NSG 212, NSL 212 (both NSG/NSL with a 73% or above). WRT 120-200, NTD 303, BIO 204, NSG 310 (with a 73% or above), PSY 100, SOC 100 or 240, and PSY 210 or HEA 206 (all with a 70% or above).

NSG 313 – APPLIED NURSING RESEARCH

***3 credit hour
Level III***

This course is designed to assist students in understanding, interpreting and applying the research process to a variety of nursing clinical situations. Opportunities will be provided to develop a literature review and to critique nursing research studies.

PRE-REQUISITES: MAT 121 or 125 (with at least 70%)

NSG 367 - NURSING IMPLICATIONS OF DRUG INTERACTIONS

***3 credit hour
Level III***

In this course, the student will be introduced to essential pharmacological principles and concepts. The nursing process will provide the framework by which students will apply theoretical knowledge in situations in a variety of health care settings.

PRE-REQUISITES: BIO 269 (with at least 70%).

NSG 411 – MEDICAL SURGICAL NURSING

***5 credit hours
Senior Year, Fall/Spring Semesters***

The emphasis of this course is on the care of persons with acute medical surgical and acute holistic health crises. Concepts of holistic care are highlighted throughout classroom and clinical experiences. The content will focus on the use of the nursing process to assist clients in crisis. The framework for the care to be given will reflect concepts including application of research, theory, ethical, legal and educational principles to assist clients in crisis.

NSL 411 Laboratory: Clinical experiences are provided in acute care psychiatric inpatient and medical surgical settings. NSG 411 and NSL 411 must be taken concurrently, 5 credit hours.

PRE-REQUISITES: NSG/NSL 311 and NSG/NSL 312 (with at least a 73%).

NSG 412 – PUBLIC/POPULATION HEALTH NURSING, NURSING**5 credit****hours Senior Year, Fall/Spring Semesters**

The emphasis of NSG 412 will be on the use of leadership, management, and public/ population health nursing concepts to manage and improve health. Students will collaborate, coordinate, and advocate as they use the nursing process independently and interdependently to as they focus on the complex problems of individuals, families, communities, populations, and systems. Students are expected to function as self-directed learners who correlate nursing/scientific theory and concepts with identifiable research problems in varied environments.

NSL 412 Laboratory - Clinical experiences are provided in an immersion experience and Community/ Public Health settings. NSG 412 and NSL 412 must be taken concurrently, 5 credit hours.

PRE-REQUISITES: NSG/NSL 311 and NSG/NSL 312 (with at least a 73%).

III. Overall Program Requirements

III. Overall Program Requirements

A. Admission Criteria

1. Traditional Undergraduate

In addition to meeting West Chester University entrance requirements, applicants for nursing must have completed work equal to a standard high school course including a minimum of 16 units: four units of English, three units of Social Studies, two units of Mathematics (one of which must be Algebra) and two units of science with a related laboratory or the equivalent. A combined score of 1250 is expected on the SAT examination.

2. Advance 2 BSN

In addition to meeting West Chester University entrance requirements, applicants for the Advance 2 BSN program must have completed a bachelor's degree from an accredited college/university with a minimum GPA of 2.75 and prerequisite course completion prior to beginning the program. Prerequisite courses include BIO 100, BIO 259* & BIO 269*, CHE 107 & CRL 107, SOC 100 or 240, PSY 100, BIO 204, PSY 210 or HEA 206, and MAT 121 or MAT 125 or their equivalencies. In addition, applicants must achieve a minimum "composite GPA" of 2.75 in the following prerequisite courses: BIO 100, BIO 259*, BIO 269* and CHE/CRL 107 (or equivalents).

**Completed within 3 years of submitting application.*

B. Technical Standards Policy for Admission, Academic Progression, and Graduation

Students selected for admission into the Nursing major must verify that they understand and meet these technical standards with or without a reasonable accommodation. A student with a condition who may need a reasonable accommodation to meet the technical standards will be referred to the Office of Educational Accessibility (OES) for an evaluation of whether the condition is a disability as defined by applicable laws, and a determination of what accommodations are reasonable. The determination will specifically take into consideration whether the requested accommodations might jeopardize the safety of the patient, and the ability to complete the classroom, laboratory, and clinical coursework required for the Nursing major. The OES,

with input from the Department of Nursing, will make this determination. Whenever possible, reasonable accommodations will be provided for those individuals with disabilities to enable them to meet these standards and ensure that students are not denied the benefits of, excluded from participation in, or otherwise subjected to discrimination.

Based on the standards benchmarked by ANA Code of Ethics, American Association of Colleges of Nursing, the Commission on Collegiate Nursing Education, PA State Board of Nursing Practice Act, the PA State Board of Nursing

Rules and Regulations and the Mission and Values Statements of West Chester University (WCU) the Department of Nursing prepares students to practice nursing safely, proficiently and empathetically with cultural awareness and humility and to think critically in diverse and challenging practice settings.

All efforts are intended to build nursing knowledge, develop nursing practice and patient safety, cultivate professional integrity, and ultimately, improve the health outcomes of patients, families, and communities across the life span and continuum of care. The student must have functional abilities that are vital for the delivery of safe, effective nursing care during clinical experiences. Therefore, the Department of Nursing has determined that certain technical standards are requisite for admission, progression, and graduation from all *pre-licensure* nursing programs.

WCU nursing student clinical experiences occur during junior and senior levels and involve functional considerations that are not similar to classroom accommodations. For this reason, applicants and students who seek accommodations prior to or immediately after enrolling in the nursing programs must also request an assessment of the types of reasonable accommodations needed for the clinical training component of the program

A student must be able to independently, with or without reasonable accommodations, meet the following technical standards of general abilities and those specifically:

General Abilities:

The student must have functional use of vision, hearing, smell and touch so that intake of sensorial information can be received and interpreted by the senses. This sensorial information can be integrated, analyzed, and synthesized consistently in an accurate

manner.

Examples (not limited to):

Collect data about skin color changes

Collect data from monitors

Auscultate (listen to) heart and lung sounds

Hear alarms or call bells

Detect smoke from burning materials

Detect odors associated with body fluids

Palpate pulses and detect changes in skin temperature

Motor & Endurance:

The student is expected to encompass gross and fine motor movements to be able to provide safe care to clients. It is expected that student have reasonable physical endurance to perform patient care. A nursing student on a clinical day is expected to have the ability to sit, walk and stand.

Examples (not limited to):

Assessments and patient care require the student to be able to bend, squat, reach, kneel and balance.

Usual clinical settings expect students to be able to carry and lift from floor to shoulder height to overhead. This would include occasionally lifting 50lbs, frequently lifting 25lbs, and constantly lifting 10lbs.

Latex Allergies

It is in the student's best interest to disclose any allergies that they may have (specifically latex). The Department and clinical agencies cannot guarantee that students will not be exposed to substances that may cause a sensitivity reaction. Students with latex allergies must provide a note from their health care provider stating that they are able to participate in the clinical experience and also provide a plan should exposure occur during a lab or clinical experience.

Pregnancy is a healthy state. Fetal exposure to environmental/chemical/microbial stressors in the clinical setting may potentially place the developing fetus at risk. Special precautions are warranted. The nursing student who becomes pregnant must notify the level coordinator. The student must provide a signed consent from her health care provider stating the student can safely continue with clinical experiences. In

addition, the student who is less than six weeks post-partum must provide a letter from her health care provider stating that she is cleared to return to clinical experiences.

A student who suffers an illness, injury, has been hospitalized, or has a surgery is required to bring a letter of clearance to the level coordinator. Depending on the length of the absence, a decision regarding progression in the nursing course will be made by Department Faculty.

Ethical Standards

The student must develop the ability to consistently deliver safe, effective nursing care using sound judgment according to the requirements of the Pennsylvania Nurse Practice Act (<http://www.pacode.com>) and the American Nurses Association Code of Ethics for Nurses (<http://www.nursingworld.org>). The student is expected to exhibit good professional character which is an integrated pattern of personal, academic, and occupational behavior. These behaviors include, but are not limited to, honesty, accountability, maintaining confidentiality, trustworthiness, reliability, and integrity, and practice non impaired (ANA Code of Ethics).

Link PA code Title 49 Professional and Vocational Standards

21.11 General functions (as you enter the practice of nurse)

21.18 Standards of Nursing Conduct (as you rise/practice)

Individual patient care must be performed regardless of the patient's race, ethnic group, age, gender, religious, or political preference, ability to pay, gender or sexual orientation. Students are not required to be involved with medical procedures that are in disagreement with individual attitudes and values but are required to learn about these procedures and participate in the professional care of the patient before and after such procedure.

Examples (not limited to):

Able to distinguish right from wrong.

Will not falsify patient's medical record or information.

Seek consultation and supervision whenever their ability to provide patient care is compromised because of lack of knowledge or experience.

Will not knowingly furnish false information to the other members of the health care profession.

Able to keep promises and honor obligations

Accountable for their own behavior.

Able to practice nursing in an autonomous role with patients/clients who may be physically, emotionally, or financially vulnerable.

Recognize and honor the interpersonal boundaries appropriate to any therapeutic relationship or health care setting.

Will promptly and fully disclose facts, circumstances, events, errors, and omissions that could enhance the health status of patient/client or the public and could protect them from unnecessary risk of harm.

Essential Behavioral and Social Attributes

The student must be able to adapt and function effectively to stressful situations in the clinical and classroom settings. Students will encounter multiple stressors while in the nursing program. These stressors may be (but are not limited to) personal, patient care/family, faculty/peer, and or program related.

Compassion, integrity, motivation, effective interpersonal skills, and concern for others are personal attributes required of those in the nursing program. The student must possess skills required for full utilization of the student's intellectual abilities; the exercise of good judgment; the prompt completion of all responsibilities in clinical settings; and the development of mature, sensitive, and effective relationships with patients and other members of the health care team. The ability to establish rapport and maintain sensitive, interpersonal relationships with individuals, families, and groups from a variety of social, emotional, cultural and intellectual backgrounds is critical for practice as a nurse. The student must be able to adapt to changing environments; display flexibility; accept and integrate constructive criticism given in the classroom and clinical settings; and learn to function cooperatively and efficiently in the face of uncertainties inherent in clinical practice.

Examples (not limited to):

The student must be able to exhibit a level of consciousness and attentiveness that guarantees patient safety.

Examples of unacceptable compromise include excessive somnolence, memory impairment, or an inability to retain pertinent details of a patient's situation.

Chronic or recurrent illnesses and problems that could interfere with patient care or safety may be incompatible with nursing education or practice.

Ability to Communicate, Comprehend, Read, and Write English

Must be able to read, comprehend, communicate, and write English at a level that meets the need for accurate, clear, and effective communication with individuals, families, and groups respecting social, cultural and spiritual needs.

Examples (not limited to):

Give clear oral reports

Read graphs

Read and understand English printed documents

Write legibly or record on computer in English in patient record

Be able to communicate effectively on the telephone

Discriminate fine/subtle differences in medical word endings

Report findings to the licensed nurse

Individuals who are unable to meet these technical standards, with or without reasonable accommodation, will not be able to complete the program and are counseled to pursue alternate careers.

In accordance with law and WCU policy, no qualified individual with a disability shall, on the basis of the disability be excluded from participating in West Chester University programs or activities. WCU will provide reasonable accommodation to a qualified individual with a disability. To obtain accommodations, individuals must request them from the Office of Services for Students with Disabilities (OSSD).

C. Academic Progression in the Nursing Major

- Complete the following courses with a minimum grade of C-:
 - [WRT 120](#) or [WRT 123](#); [WRT 200](#), [WRT 204](#), [WRT 205](#), [WRT 206](#), [WRT 208](#), or [WRT 220](#); [BIO 204](#); [NTD 303](#); [PSY 100](#); [SOC 100](#) or [SOC 240](#); [PSY 210](#) or [HEA 206](#); [MAT 121](#) or [MAT 125](#).
- Students are required to achieve a science composite GPA of 2.75 in the following courses to progress to [NSG 212/NSL 212](#), [NSG 310](#), and the subsequent upper-division nursing courses: [BIO 100](#) (or [BIO 110](#)), [BIO 259](#), [BIO 269](#), and [CHE 107/CRL 107](#). Coursework to achieve this science composite GPA must be completed no later than the Fall semester preceding the Spring semester when students enroll in [NSG 212/NSL 212](#) and [NSG 310](#). Students may not complete science composite GPA courses in the winter session immediately preceding enrollment in [NSG 212/NSL 212](#) and [NSG 310](#).
 - Students who are unsuccessful in attaining the required 2.75 science composite GPA must repeat the science course with the lowest grade.

- If two courses that contribute to the science composite GPA have the same lowest grade, the student must repeat the course with the higher credit load.
 - For example, if a student does not meet the Science Composite GPA requirement and has a C- in [BIO 100](#) (3 cr.) and [BIO 259](#) (4 cr.), the student would repeat [BIO 259](#).
- If the two lowest grade courses are of equal credit load, the student will repeat the lowest grade course in the following order of priority: [BIO 269](#), [BIO 259](#), [BIO 100](#), [CHE 107](#), [CRL 107](#).
 - For example, if a student does not meet the Science Composite GPA requirement and has a C- in both [CHE 107](#) and [BIO 269](#), the student would repeat [BIO 269](#).
- Complete all undergraduate NSG and NSL courses with a minimum grade of C for academic progression in the program.
 - If a student must repeat [NSG 212/NSL 212](#), [NSG 311/NSL 311](#), [NSG 312/NSL 311](#), [NSG 411/NSL 411](#), [NSG 412/NSL 412](#) a grade of C or better must be achieved in both the theory (NSG) and laboratory (NSL, clinical practicum) components. The theory (NSG) and clinical portions (NSL) of these nursing courses must be taken concurrently.

Academic Progression in the Nursing Major (Pre and Post-licensure)

Students who fail to progress in their major (fail to meet composite, fail to earn a 73% in the nursing courses, or for any other reason) are considered out of sequence and not automatically guaranteed a seat in the nursing major. These students will be ranked according to cumulative GPA with all other students who are out of sequence. Enrollment will be offered on a space available basis.

Students who return to the nursing major must demonstrate competency in calculation of dosages. The student is required to attain 100% proficiency in the test administered.

Students who are in the Advance 2 BSN program may not transfer into the traditional 4 year program and students who are in the traditional 4 year program may not transfer into the Advance 2 BSN program.

GRADE ACHIEVEMENT REQUIREMENTS

The grade achievement in the remaining courses required for graduation is governed by the current university policy.

If a student must repeat a nursing course, a satisfactory grade (73% or above) must be achieved. Non-achievement of at least a 73% in such cases is considered grounds for dismissal from the nursing major. Unsatisfactory, consistent non-attainment of stated objectives in clinical nursing courses may result in dismissal from the nursing program. At all times, the theoretical and clinical components of the nursing courses must be taken concurrently.

Students may be required to make up theory and/or clinical due to labor disputes.

D. Academic Achievement and Promotion

In addition to the specific requirements outlined above, students in nursing must achieve the West Chester University level of Quality Point Index for retention and promotion, i.e:

University Probation and Dismissal Policy

Maintenance of Academic Standards: Probation and Dismissal

A student's scholastic standing at the University is indicated by their cumulative grade point average (GPA). Three categories of academic standing have been established: Good Academic Standing, Probation, and Dismissal. A student remains in good academic standing as long as they maintain a minimum cumulative GPA of 2.00 for all work taken at the University. Probation and dismissal are actions taken by the University when a student's GPA falls below an acceptable level at the end of the fall or spring term. No student will go on or come off academic probation, or be dismissed from the University for academic reasons, at the end of the summer term.

See http://www.wcupa.edu/admin/associateprovost/policies_procedures.html for complete policy.

PLUS/MINUS GRADING:

<u>GRADE</u>	<u>QUALITY POINTS</u>	<u>% EQUIVALENTS</u>
A	4.00	93-100
A-	3.67	90-92
B+	3.33	87-89
B	3.00	83-86
B-	2.67	80-82
C+	2.33	77-79
C	2.00	73-76
C-	1.67	70-72
D+	1.33	67-69
D	1.00	63-66
D-	0.67	60-62
F	0.00	59 or lower

For more detailed information on this policy and grades of NG, W, and AU please check the university *Undergraduate Catalog*.

University Repeat Policy: Students may repeat undergraduate college-level courses to improve a grade of F, D, C, or B (not A).

1. No student may use the repeat option more than six times TOTAL. For example, this means repeating six DIFFERENT courses once each, or repeating three different courses twice.
2. A single course may not be repeated more than twice.
3. The most recent grade, regardless of whether it is higher or lower, will be the grade used for the GPA calculation.

Undergraduate students who *take* and *complete* a course at West Chester may not repeat the course at another institution and have the credits or grade count towards a West Chester degree.

Undergraduates who take a course for graduate credit are subject to the graduate repeat policy. See the Graduate Catalog for information.

Because all students must take and pass WRT 120 to graduate, a student who fails this course after three attempts will be dismissed immediately following the third failure, regardless of GPA.

E. Nursing Class Attendance Policy

The faculty believes the interactive process of learning takes place in the classroom and is a part of professional behavior. Attendance in class is mandatory and required for nursing courses. Students are responsible for reading specific attendance requirements in each syllabus. Please also refer to the Undergraduate Student Attendance Policy: <https://catalog.wcupa.edu/undergraduate/academic-policies-procedures/course-policies/>

F. Electronic Device Policy

Use of Electronic Devices

Students are not permitted to make phone calls, send text messages/emails, or engage in non-class related internet activity while in the clinical or classroom setting without the permission of the instructor. During clinical, taking photographs of patients is not permitted. No patient-identifiable information is to be stored on the device or removed from the clinical agency. Additional restrictions or rules may apply to the agency or instructor. Violations of this policy will be considered a

violation of Standards of Safe Clinical Practice.

G. Student Records and Advisement

1. *Departmental*

All students enrolled in the Department of Nursing have access to their records on request. The academic electronic file includes admission and schedule information. The Department of Nursing academic file may hold clinical evaluations, copies of student papers, and any other materials the department or student deems important. To minimize the risk of improper disclosure of any kind, academic and disciplinary records (if available) are separated. Data from the counseling and disciplinary records are not available to unauthorized persons on campus or to any person off campus except for compelling reasons. Students need to provide written consent for records to be shared outside the University.

It may be necessary for accrediting and approving bodies to examine student files as part of their evaluation process.

When students request that materials from their files be forwarded to anyone, either within the University or outside of the University, a written permission form must be completed and signed by the student for this to be made possible.

2. *Academic Advising*

Advising within the Department of Nursing is based upon the belief of the university that each student is an individual with unique needs, problems, interests, and aspirations.

The department provides academic advising to students beginning with summer pre- entrance orientation and continues on all four levels. The chairperson meets with all incoming first year nursing students during the summer orientation at the university. Curriculum questions are answered and the general policies relating to the department are reviewed. Uniforms, fieldwork, miscellaneous expenses, and other items of interest to the student are also reviewed.

The Department of Nursing encourages active participation of the faculty in the area of academic advising. Each faculty member is assigned student advisees by the chairperson. The faculty member is available for advisement during posted office hours and by appointment. Five hours per week are designated and posted on faculty doors. Office hours may change from semester to semester

because of differences in clinical assignments. Be sure to check.

Each semester students must meet with their academic advisors to plan their course selection for the following semester. One or two weeks prior to registration, master schedules are available on myWCU. Students must access these schedules and plan what courses will be taken the following semester. The student then discusses this selection with the faculty advisor during regular office hours or at special times posted by faculty members specifically for pre-scheduling. Students will then register at scheduled times on myWCU. Students should maintain open communication with their advisor for any academic-related question or concern during the school year.

The faculty member may suggest the use of the Academic Advisement Center or the Counseling Center on campus to meet the needs of students. This service is a free choice of the student.

3. *Services to Accommodate Students with Disabilities*

Please refer to Essential Behavioral and Social Attributes on Page 28.

Services to accommodate students with disabilities are also available through the Office of Educational Accessibility (OEA). OEA is located within the Academic Affairs Division of the university. The university's American with Disabilities Act policy statement is located in the undergraduate catalog. The OEA coordinates accommodations and acts as a liaison with faculty, university offices and external agencies. Academic support services and accommodations are provided for eligible students with physical or learning disabilities. Environmental accommodations, tutoring, coaching, workshops in math, career development, study strategies, and a student support group are available through this office. Eligible students must meet the Association on Higher Education and Disability (AHEAD) guidelines for learning disabilities and attention deficit disorders.

It is recommended that students contact the OEA director as early as possible to allow time for testing or to forward appropriate documentation. To request accommodation or more information, visit the OEA homepage:

<https://www.wcupa.edu/universityCollege/OEA/>

4. *Financial Aid*

All requests for scholarships, loans, and employment opportunities should be made to the Director of Financial Aid at 25 University Avenue, West Chester University. Loan and scholarship information

is available through the office of Financial Aid and a description of the financial aid programs available at West Chester University may be found in the Undergraduate catalog and the Ram's Eye View.

5. *Scholarships*

Numerous scholarships are available and will be announced annually.

H. **Academic Dishonesty Policy**

The Department of Nursing endorses the university policy on student academic dishonesty as published in the university catalog and Ram's Eye View. See the University Academic Integrity Policy (*WCU Undergraduate Catalog*).

I. **Graduation Requirements**

1. ***NCLEX Examination and Licensure: All students must attend the ATI Live Review course offered the week following graduation. Students who do not score at least a 94% predictive probability on the RN Comprehensive Predictor Exam will need to retake the Exam after completion of the ATI Live Review. Students who do not achieve a score that is equal to or greater than the predictor probability of 92% of passing the NCLEX-RN on the second Comprehensive Predictor will not be cleared for taking State Boards until they have completed the Virtual ATI and have been given the "green light" to take the exam. Virtual ATI will be purchased at the expense of the student.***

Students or former students who have not taken the NCLEX must meet all program requirements to be eligible for graduation/nursing education verification. Department paperwork will not be submitted to the State Board of Nursing until the BSN is officially conferred by the Registrar's Office on the student's transcript and all program requirements have been met.

“The Board shall not issue a license or certificate to an applicant who has been convicted of a felonious act prohibited by the act of April 14, 1972 (P.L. 233, No. 64), known as ‘The Controlled Substance, Drug, Device and Cosmetic Act’ or convicted of a felony relating to a controlled substance in a court of law of the United States or any other state, territory or country unless:

- (1) at least ten (10) years have elapsed from the date of conviction.
- (2) the applicant satisfactorily demonstrates to the Board that he has made significant

progress in personal rehabilitation since the conviction such that licensure of the applicant should not be expected to create a substantial risk of harm to the health and safety of patients or the public or a substantial risk of further criminal violations; and

- (3) the applicant otherwise satisfies the qualifications contained in or authorized by the act.

As used in the subsection the term ‘convicted’ shall include a judgment, an admission of guilt or a plea of nolo contendere. An applicant’s statement on the application declaring the absence of a conviction shall be deemed satisfactory evidence of the absence of a conviction, unless the Board has some evidence to the contrary.” (Pennsylvania State Board of Nursing, Professional Nurse Law, September 2009).

2. *Application for Licensure*

For those students who will be working prior to taking NCLEX, the PA State Board of Nursing will issue a temporary practice permit to the graduate. The student must apply for this permit at the same time as they apply for licensure. The employer must have on file a state board approved temporary practice permit before anyone who is not currently licensed in PA may be employed as a nurse. If the permit holder fails the NCLEX, the permit becomes VOID and must be returned to the PA State Board of Nursing.

The temporary practice permit application is combined with the Application for NCLEX- RN Exam. Students must apply online to be approved by the PA State Board of Nursing to take NCLEX.

3. *Outcome Assessments*

Students must participate in activities designed to evaluate learning outcomes. One of the current outcome measures utilized by the Department of Nursing is the ATI RN Comprehensive Predictor Exam. This Exam is a requirement for all seniors in their last semester of their senior year.

Level II students will purchase the RN Comprehensive Assessment and Review Program from ATI during their spring semester.

III. Clinical Requirements

A. Requirements for all Nursing Students Prior to Admission to NSG/NSL 311 (first clinical course)

1. *All Course Prerequisites as Stated in Academic Policies*

Penalties for Non-Compliance of COMPLIO and Clinical Requirements:

Students who do not submit completed records of their background checks, drug screen, certifications, and immunizations records as defined by the Department Chair are considered non-compliant. Immediate remove from nursing core courses will occur and the student will not be permitted to reenroll until further determination.

2. *CPR Certification*

Nursing students enrolled in nursing courses with a clinical component (NSG/NSL 311, 312, 411, and 412) are required to be currently certified in Life Support (2-person) Cardio-Pulmonary Resuscitation. Each student is responsible for making his/her own arrangements for initial certification and for renewals. Courses given by the American Red Cross or the American Heart Association are among the acceptable resources for CPR certification. The CPR course must include certification in two rescuer resuscitation and resuscitation of children and infants. Students will not be permitted to participate in clinical experiences until current CPR validation (e.g. CPR card) is submitted to the appropriate database. A CPR course is offered by the Nursing Department each spring.

3. *Liability (Malpractice) Insurance*

Nursing students are required to have professional liability insurance when enrolled in nursing courses with a clinical laboratory component (NSG/NSL 311, 312, 411, and 412). The face sheet of the insurance policy must be submitted at the beginning of NSG/NSL 311 and 411 to Certified Background. The student may not begin clinical experience until the policy is on file.

Forms for subscribing for insurance are available from the secretary in the Nursing Department. Students may apply on-line and pay for their insurance.

At the present time, students are required to carry coverage in the amount of \$1,000,000/\$4,000,000 to meet the requirements of some of the clinical agencies.

4. *Criminal and Pennsylvania Child Abuse History Clearance*

In accordance with Pennsylvania Nursing Law and Child Protective Services Law as an effort to protect client safety and property, students will be required to complete a criminal background check before progressing to NSG 311/NSL 311/NSG 312/NSL 312, and NSG 411/NSL 411/NSG 411/NSL 412. In addition, students will be required to complete Delaware Child and Elder Abuse History Clearance prior to NSG 311/NSL 311/NSG 312/NSL 312.

Clinical placements may be denied by the clinical site due to felony or misdemeanor convictions, or other adverse findings, and the inability to be placed at a clinical site will prohibit the student from graduating. Since there is not a comprehensive list from clinical sites and licensing agencies, we cannot provide guidance on what would absolutely exclude the student from clinical placement or licensure. However, these decisions are typically dependent upon the nature of the incident, time since the incident occurred, and frequency and type of the incident.

It should be noted by all nursing students that the Professional Nursing Law provides that the Pennsylvania State Board of Nursing may refuse applications for professional nursing licensure if the applicant “has been convicted, or has pleaded guilty, or entered a plea of nolo contendere, or has been found guilty by a judge or jury, of a felony or a crime of moral turpitude, or has received probation without verdict, disposition in lieu of trial or an Accelerated Rehabilitative Disposition in the deposition of felony charges, in the courts of this Commonwealth (of Pennsylvania), the United States or any other state, territory, possession or country.” Moral turpitude has been defined by the Commonwealth Court of Pennsylvania as “anything done knowingly contrary to justice, honesty, or good morals.” Determination of whether a crime is one of moral turpitude depends on the element of the crime as they are enumerated under the criminal statute. All crimes in which fraud is an element are looked on as involving moral turpitude. The Board is authorized to reject application for licensure to anyone who has been convicted of a felony or crime of moral turpitude, even if the crime was not related to the practice of nursing or was not committed while in the practice of nursing.

5. *Substance Abuse Policy*

Students are expected to perform unimpaired. Prior to progressing to the nursing courses (NSG 311/312, etc.), a student must have a

negative substance abuse result. Students suspected of substance abuse as evidenced by documented impaired behavior are also subject to further testing. This policy is in addition to the West Chester University of PA Student Code of Conduct and the Drug-Free campus policy. (Section III, Ram's Eye View).

Substance Testing

Students must have a test performed at the designated laboratory during the stated testing period before progressing to each of the following courses: NSG 311/312 and NSG 411/412. Tests are performed by a qualified agency or laboratory using standard procedures for maintaining chain of custody. Tested substances are: amphetamines, barbiturates, benzodiazepines, cannabinoids, cocaine, opiates and phencyclidine. Students are responsible for all costs associated with these tests. Students' results are sent directly to the Department of Nursing. Students with a positive result will be dismissed from the Nursing major. Refusal to be tested will result in dismissal from the Nursing major.

6. *FBI Check*

Students must have a FBI check performed before progressing to each of the following courses: NSL 311/312 and NSL 411/412. Students will be given specific instruction on how to complete this requirement prior to NSL 311/312 (whichever course is taken first). Students are responsible for costs associated with this check. Student results are accessed directly by the clinical agency. Student access to the clinical agency is at the discretion of the clinical agency based on this FBI check.

7. *Health Requirements*

A Health Form is required for all nursing students at WCU prior to beginning junior year. This requirement helps to protect the health of the students as well as the clients with whom you come in contact while providing nursing care. In order to comply with agency requirements, a QuantiFERON blood test will be required annually for all students prior to junior year. Our department requirements conform to the rules and regulations of the Pennsylvania State Board of Nurse Examiners in regard to provisions for the protection of students' health and requirements of our clinical affiliates.

Student's health problems should be identified and how the problem will be remediated in their annual physical. Students will attest to the accuracy of their medical history. The student's provider will verify student's fitness for duty. In some cases, students must provide a provider's clearance to participate in the clinical setting.

- a. The health report for current sophomores (juniors in the fall) must include:
 1. completed health form.
 2. evidence of immunity to Rubella, measles, mumps, poliomyelitis, flu, tetanus, diphtheria, pertussis, **Hepatitis B**, and varicella.
 - a. evidence of covid vaccine
 - b. immunization record - evidence of first 3 series vaccination and booster of Tdap within the last 10 years OR laboratory test results showing positive titer

The **Hepatitis B** immunization process is a three-injection series that occurs over a six month period; initial dose, one month later second dose and five months later third dose. Therefore, the vaccination must be started **no later than** the beginning of the spring semester prior to entering NSG/NSL 311/312. ***

***** Prior to starting NSG/NSL 311/312, you must have been vaccinated or show proof of an acceptable titer.**

The **Covid Vaccine** is required to attend clinical. If students do not receive the covid vaccine, they may not be placed with a clinical agency, preventing them from progressing in the program. Please see the Attestation Form.

NO student will be permitted to begin NSG/NSL 311/312 without completion of **ALL** preclinical requirements.

8. *Health Insurance*

Students are to be covered by their own health insurance policy. If students do not have their own insurance, they are encouraged to consider Affordable Care Act.

B. Additional Requirement(s) for all Nursing Students Entering the First Clinical Rotation

1. *Successful Completion of Calculations Test*

Competency in calculation of dosages shall be a prerequisite for entry into NSG/NSL 311/312. The student is required to have attained 100% proficiency in calculating dosage as measured by a paper and pencil test administered within the time frame prior to enrolling in NSG/NSL 311/312. Students who drop back a year because of not meeting pre-requisites for NSG 311/312, will need to repeat the drug calculations exam before entering clinical.

C. **Student Guidelines for Communicable Diseases**

The West Chester University AIDS Guidelines serve as an underlying basis for this Communicable Disease Policy.

Nursing professionals including faculty have a fundamental responsibility to provide care to all clients assigned to them, and the refusal to care for those patients is contrary to the ethics of the profession. All clients have a right to humane, quality care.

1. *Introduction*

Nursing faculty have a responsibility for instructing students in the provision of care based on sound knowledge and professional values. As all clients are potential carriers of communicable diseases, the ability to care for these clients safely is essential. It is the students' responsibility to inform clinical faculty of exposure or symptoms of any communicable disease.

2. *Communicable Disease Policy*

- a. All Nursing majors, prior to direct client contact, must receive instruction concerning the modes and risks of acquiring and transmitting communicable disease in the clinical setting.
- b. All students, prior to direct client contact, must receive instruction concerning infection control precautions such as the standard precautions presented by CDC. This instruction will also include appropriate response/recommendations in the case of an exposure such as a needle stick injury.
- c. All students must demonstrate knowledge of and skill in the performance of basic aseptic technique *before they begin clinical practicum*. Students who fail to do so will not meet clinical course requirements.
- d. All students will be required to care for clients with communicable diseases.
- e. It is the responsibility of the student to follow the CDC Guidelines in minimizing risk of infection at the clinical setting.
- f. It is the responsibility of the student to obtain the personal protection measures such as immunization/vaccination that are required or recommended by the Dept. of Nursing.
- g. In the case of refusal by a student to care for a client with a

communicable disease, the Department of Nursing will pursue the following steps:

- 1.) The Nursing Student will receive additional education and counseling underscoring the obligation to provide care for all clients who have communicable diseases.
- 2.) If refusal continues, career counseling will be recommended.
- 3.) Nursing Students are hereby notified that continued refusal to care for a client with a communicable disease may result in dismissal from the nursing program.

CDC's recommendation on Infection Control:

<https://www.cdc.gov/infectioncontrol/guidelines/index.html>

D. Standards of Safe Clinical Practice

In all clinical situations, students are expected to demonstrate responsibility and accountability as professional nurses, with the ultimate goal being health promotion and prevention of harm to others. The Department of Nursing believes that this goal will be attained if each student's daily clinical practice is guided by the Standards of Safe Clinical Practice.

Safe clinical performance always includes, but is not limited to, the following behaviors; therefore, I will:

1. Practice within boundaries of the nursing student role.
2. Comply with instructional policies and procedures on implementing nursing care.
3. Prepare for clinical assignments according to course requirements and as determined for specific clinical setting.
4. Provide nursing care that may be required to promote health and prevent illness or further complications.
5. Demonstrate the application of previously learned skills and principles in providing nursing care.
6. Administer medications and/or treatments responsibly according to guidelines provided by the Department of Nursing and agency.
7. Promptly report significant client information in a clear, accurate, and complete oral or written manner to the appropriate person(s).

Acknowledgement

I have read the West Chester University Department of Nursing Standards of Safe Clinical Practice. I understand that these standards are expectations that guide my clinical practice and will be incorporated into the evaluation of my clinical performance in all clinical courses. Failure to meet these standards may result in my removal from the clinical area, which may result in clinical failure.

Signature & Date

Print Name

During enrollment in the West Chester University School of Nursing BSN Program, all students, in all clinical activities, are expected to practice according to the Standards of Safe Clinical Practice.

Failure to abide by these standards will result in disciplinary action, which may include dismissal from the Nursing Program.

PROCEDURES

1. BSN students will receive a copy of the Standards of Safe Clinical Practice in NSG 212.
2. Students are required to read the Standards and sign a statement that they have read and understand the Standards. This statement will be kept during the student's enrollment in the BSN Program.
3. At the beginning of each subsequent clinical course, the Standards of Safe Clinical Practice will be reviewed with students by the appropriate level coordinator.
4. If any violation jeopardizes patient safety, the student may be removed from the clinical setting.
5. Violation of these Standards will result in the following disciplinary action:

A. First Violation

- 1) Student will be given an immediate oral warning by the appropriate faculty member. The incident will be documented by the faculty member on the *Violation of Standards of Safe Clinical Practice* form. The student has the opportunity to include their comments in the *Student Comments* section of the form. One copy of this form will be given to the student (either hard copy or electronic copy) and one copy will be kept in the student's confidential record.
- 2) At the discretion of the faculty member, the student may be required to leave the clinical area for the remainder of the day and may not be allowed to return to the clinical area.
- 3) If the student has not been dismissed and remains in the Program following the above disciplinary action, any additional violation will be documented and referred as above for disciplinary action, which may result in student dismissal from the Program.
- 4) If this violation is of a serious nature (any act which places a client in physical or psychological danger), in addition to Step 1 & 2, it may be referred to the Level Coordinator and Level Team for further disciplinary action as in B below. The student will be given notice and have an opportunity to be heard by and meet with the Level Coordinator and Level Team prior to any disciplinary actions.

B. Second and Subsequent Violations

- 1) In addition to 5A, the faculty member will document the incident on the *Violation of Safe Clinical Practice* form. Following discussion of the incident with the student, the faculty member will forward a copy of the form to the Level Coordinator and Chair of the Department of Nursing, for review and recommendation regarding further action. The student will be given notice and have an opportunity to be heard and to meet with the Level Coordinator and Level Team prior to any disciplinary actions.
- 2) The recommendation of reprimand or dismissal will be forwarded by the Level Coordinator to the Department Chair for review and approval. This disciplinary action process will be documented and placed in the student's confidential record.
- 3) If the student has not been dismissed and remains in the Program following the above disciplinary action, any additional violation will be documented and referred as above for disciplinary action, which may result in student dismissal from the Program.

Student Appeal Procedures:

A student may appeal a first violation processed under section 5.A. 1 & 2 above according to the following procedures:

1. Student may appeal the Violation with the issuing faculty member within 2 business days of the date of the Violation. If the appeal is not mutually resolved, the student may then appeal to the Level Coordinator within 4 business days of the date of the Violation.
2. If the appeal is still not satisfactorily resolved, the student may then appeal to the Department Chair within 2 business days after completion of Step 1.
3. The student may appeal the decision of the Department Chair to the College of Health Sciences Associate Dean within 2 business days after the Chair's decision. The Associate Dean's decision will be the final determination of the University. Student may appeal a second or subsequent violation or a first violation of serious nature under section 5.A.4 above according to the following procedures:

Injury/Incident Form

A West Chester University Department of Nursing Incident Report is filed when any unusual event occurs (such as exposure to infectious disease or

hazardous material; life threatening injury, needle sticks, falls, or being struck by a patient, etc.) which may cause injury to students. Students assume the risk of injury at all clinical sites and laboratory settings and hold West Chester University harmless. The Department Chair and course coordinator should be notified as soon as the faculty member has knowledge of such an event. The completed form should then be sent to the Nursing Department Administrative Assistant for processing.

E. Clinical Attendance Policy *

Attendance at all clinical and laboratory experiences is required in order to meet the educational objectives of each nursing course. In the case of illness, it is the student's responsibility to notify faculty and the clinical agency (if applicable) if they are unable to be present for the clinical laboratory experience.

There will be no grade point penalty associated with clinical absences. However, clinical absences of up to 12 hours per semester must be made up by attending clinical makeup day as scheduled by the faculty. Students who fail to attend the clinical makeup day will receive an IP grade and must complete the online makeup modules as outlined further in this policy. Failure to complete required makeup work will result in a failing grade in the clinical course.

More than 12 hours absenteeism from a single rotation but less than 35% of the clinical hours (27 hours per rotation or 54 hours from the total semester) will result in an IN-PROGRESS (IP) grade for clinical as the student will not be able to meet the clinical objectives set forth in the CET. The student will then be required to complete online educational modules prior to the start of the next semester with all modules to be completed to receive a completed grade for credits. Students that miss more than 35% of the assigned clinical hours for one rotation will receive a failing grade for the course.

Hours Missed	Makeup Requirements
1-12	Attend Clinical Makeup Day
>12 hours per semester	Attend Clinical Makeup Day <i>and</i> Receive Incomplete (IP) grade, must complete online modules during semester break to complete clinical course, earn letter grade and progress
>27 hours (35%) in a single clinical rotation or >54 hours (35%) from the total semester	Clinical Failure as student cannot meet the objectives of Clinical Evaluation Tool

SIMULATION: It is important to prepare for your simulation experiences. All prep work must be completed prior to attending. Students are expected to complete prep work and arrive on time and be prepared. Should students not attend or not be prepared, students will be marked absent and it will count toward a clinical absence.

Simulation Lab – Late Arrival Policy

Rationale:

- Simulation is currently counted as clinical hours.
- Professionalism is an outcome of Clinical Evaluation Tool (CET), lateness is an aspect of professionalism

Students who arrive late for simulation lab will be permitted to attend and participate, as long as they have completed the assigned simulation pre-lab assignments as per simulation preparation policy.

If the student arrives less than 1 hour late to simulation lab, a written make-up assignment will be assigned. If this written assignment is not submitted within one week and/or does not meet assignment expected outcomes, the lateness converts to a clinical absence of one hour as per clinical absence policy.

If students arrive late to simulation lab at 1 hour or more, a written make-up assignment will be assigned. If the assignment is not submitted within one week and/or does not meet assignment expected outcomes, the lateness converts to a clinical absence equal to the amount of time missed as per clinical absence policy.

F. Attendance at Professional Conferences

Students may submit a written request (two weeks in advance) to be excused from a classroom and/or clinical laboratory experience in order to attend a professional meeting at the discretion of the faculty =and the pre-licensure coordinator,* to be limited to one per semester.

*** e.g., Student Nurses' Association Convention, continuing education program, or poster presentation.**

NOTE: A job interview does not meet the criteria of a professional day.

G. Transportation to Clinical Agencies

As stated in the University catalog, students are required to supply their own transportation to clinical facilities.

****Please note** – some rotations will require students to have their own means of transportation during the clinical day. Carpooling and/or public transportation to clinical during those rotations are not feasible.

H. Dress Code (Uniforms, etc.)

The faculty believes that the appearance of a nurse is important. The nurse is part of the patient's environment for healing. The Department of Nursing designates a standard dress code and requires that the student obtain the necessary items prior to entering the first clinical practicum. These items include:

1. Eggplant (purple) uniforms may be purchased by the student for many of the hospital settings.
2. An identification tag that includes two lines as follows:

Student's Name
Nursing Student

3. Please refer to the Student Affairs Information Guidelines regarding uniform purchase. Forms are distributed in NSG 212 and can be found on D2L.
4. Gray WCU jacket is the only uniform jacket acceptable for clinical.

The following outline states other requirements of the dress code by the Student Affairs Committee, accepted by the West Chester University Department of Nursing faculty, December 2019.

Dress Code & Appearance

Hair - Neat and preferably no longer than to the collar

Jewelry - Earrings: Small, pierced, inconspicuous, non-dangling earrings are acceptable limit one earring per ear

Watch - A watch with a second hand is necessary

Other - Wedding bands are acceptable

Makeup - Lightly worn facial makeup is acceptable

Nails - No artificial nails. Nails not to exceed ¼ inch in length. Only clear nail polish is acceptable

Facial Hair - Facial hair should be maintained as neat & trimmed at all times

Body Art - Ear piercings should be limited to one stud per ear. No other body piercings may be visible. If visible, facial piercings must be removed or covered.

Tattoos - They must be covered.

Name Pin - Must be worn as part of the uniform

Shoes - Leather or impenetrable professional shoes; no open back/open toe clogs. Shoes should be clean and in good repair.

Overall professionalism is expected with dress code and appearance. It is at the faculty's discretion as to an appropriate, professional appearance.

*****DISCLAIMER:** *Clinical agency guidelines may vary regarding dress code & appearance. Students must abide by the guidelines of the institution.****

I. Use of Social Media

The use of social media and other electronic communication is increasing with growing numbers of social media outlets, platforms and applications, including blogs, social networking sites, video sites, and online chat rooms and forums. Nurses often use electronic media both personally and professionally. Instances of inappropriate use of electronic media by nurses have been reported to boards of nursing and, in some cases, reported in nursing literature and the media.

Federal law reinforces and further defines privacy through the Health Insurance Portability and Accountability Act (HIPAA). HIPAA regulations are intended to protect patient privacy by defining individually identifiable information and establishing how this information may be used, by whom and under what circumstances.

Potential consequences for inappropriate use of social and electronic media by a nurse are varied. The potential consequences will depend, in part, on the particular nature of the nurse's conduct.

Board of Nursing Implications

Instances of inappropriate use of social and electronic media may be reported to the Board of Nursing. The laws outlining the basis for disciplinary action by a Board of Nursing vary between jurisdictions. Depending on the laws of a jurisdiction, a Board of Nursing may investigate reports of inappropriate disclosures on social media by a nurse on the grounds of:

Unprofessional conduct; unethical conduct; moral turpitude; mismanagement of patient records; revealing a privileged communication; and breach of confidentiality.

If the allegations are found to be true, the licensed nurse may face disciplinary action by the Board of Nursing, including a reprimand or sanction, assessment of a monetary fine, or temporary or permanent loss of licensure. (National Council on State Boards of Nursing (August, 2011). *White Paper: A Nurse's Guide to Social Media*)

The entire White Paper can be found on the National Council's website www.ncsbn.org

Students are held to the same standards stated above and may face dismissal from the program if found to be using social media in an inappropriate manner.

J. Student Employment

Employment in health care settings is not required for students in the nursing program. However, many students choose to work part-time during the school year and/or full-time during the summer vacation period in hospitals, nursing homes, rehabilitation centers, or other health care agencies. In most instances, they are employed as nursing assistants or in dealing with clients and families.

When seeking or accepting employment in a health care agency, students should be acutely aware of Section 21.112a of the Rules and Regulations of the Pennsylvania State Board of Nurse Examiners, as follows:

"If students are employed in health agencies, they may not be employed as registered or practical nurses unless they are currently licensed."

Nursing students employed in any position involving client care must work under the direct supervision of a registered nurse, and must not perform any tasks or accept any responsibilities reserved for practical nurses by the Practical Nurse Law of Pennsylvania or for registered nurses by the Professional Nursing Law, which governs the practice of professional nursing in Pennsylvania. Violation of these guidelines could result in a malpractice lawsuit being brought against the student.

In some health care agencies, an attempt has been made recently to encourage or even require nursing student employees to perform functions which are legally reserved for RN's or LPN's. Students applying for a position in a health care agency should always ask for a detailed job description and job title. Any description or title other than a standard one such as "nursing assistant," "nurse aide," or "ward clerk" should alert the student to investigate further, probably through discussion with her faculty advisor. "Nurse Extern" is one example of a title which can confer inappropriate and/or illegal responsibilities on a student who accepts it prior to graduation.

V. Student Activities

STUDENT ACTIVITIES

A. Student Affairs Committee

The Student Affairs Committee has been designed to facilitate interaction between faculty and students. Each cohort will have 2-5 student representative and attend monthly meetings. Faculty and cohort representatives plan and coordinate the Mary Kline Lecture Series and Professional Day, the Pinning Ceremony, and additional informal gatherings.

B. Fundraising Activities

Nursing Fundraising Policy: Students in the Department of Nursing participate in various fundraisers throughout the semesters to help offset the cost of pinning or graduation ceremonies, recruiting, and conference attendance.

- Any Nursing Department related fundraising activity requires prior approval by the Student Affairs committee. This includes but is not limited to: Class or SNAP of West Chester University.
- No two groups shall do the same fundraiser within a two-week time frame unless it is a bake sale or restaurant fundraiser that will only run for one day. In those instances, a one-day fundraiser shall be done on separate days. For example, if SNAP is selling t-shirts, Class of 2016 will not be able to sell t-shirts for two weeks after SNAP sales end.

C. SNAP (Student Nurses Association of Pennsylvania)

One of the goals of the Nursing Department is to encourage a commitment to professional nursing. The SNAP organization offers a means for students to achieve that objective. SNAP helps build professional nursing interests and aids in the development of the whole person through various educational programs and services which encourage nursing students to participate in interdisciplinary activities. SNAP gives students an opportunity to be involved in nursing and prepares the student for future memberships in nursing organizations such as The American Nurses Association (ANA) and The National League for Nursing (NLN). SNAP is a state constituent of the National Student Nurses Association (NSNA).

All students are invited to join SNAP/NSNA. Since West Chester University SNAP is a constituent of NSNA, its members are entitled to send delegates to both state and national conventions. The number of

delegates to which our SNAP is entitled depends on the number of NSNA members we have. Other students can attend these annual conventions and are encouraged to do so. WCU SNAP also provides services to organizations such as the Red Cross Bloodmobile, the West Chester Senior Citizens Center, and has participated in health fairs at local shopping malls.

**Students (sophomores, juniors, and seniors) must be in good standing with 73% or better for all nursing courses at the time of registration for a national conference. Students must get permission to go to SNAP from the course coordinator. See permission sheet (refer to table of contents). The student will not be required to make-up a missed clinical day due to SNAP attendance.

D. Mary Kline Lecture Series and Professional Day

An annual campus-wide lecture series has been established by the Department of Nursing to honor Mary L. Kline, a distinguished member of the nursing faculty who retired in 1983 after fourteen years of dedicated teaching and service to the university. These lectures are held annually in the fall semester.

Several other professional activities are also planned for this day, including panel discussions and opportunities for contact with potential employers and graduate education programs.

E. Sigma Theta Tau International Honor Society of Nursing (Sigma)

The Honor Society of the Department of Nursing, West Chester University, was established in the spring of 1985. The first induction ceremony for the society was held on March 24, 1985. On April 17, 1994, the Honor Society was chartered as Xi Delta Chapter of Sigma Theta Tau International Honor Society of Nursing in a ceremony conducted by Elizabeth Carnegie, DPA, RN, FAAN, Member of the Board of Directors of Sigma Theta Tau. The purposes of this society are to recognize superior achievement, recognize the development of leadership qualities, foster high professional standards, encourage creative work, strengthen commitment to the ideals, and purposes of the profession.

Membership is open to undergraduate and graduate students enrolled in the nursing program who have demonstrated superior scholastic achievement and potential for professional leadership as well as to community nurse leaders. Undergraduate candidates must have achieved a grade average of at least 3.25 and be in the top one-third of their class; graduate students are eligible if they have achieved a grade-point average

significantly higher than the minimum requirement for graduation. This should be at least a 3.5 on a 4.0 scale. Community nurse leaders must have a minimum of a baccalaureate degree and have demonstrated marked achievement in nursing education, practice, research or publication.

F. Pins

After having successfully completed the nursing major, senior students have the option of purchasing a pin representing graduation from the West Chester University Department of Nursing. These pins are usually awarded at a department Pinning Ceremony during graduation week. More information will be available at senior class meetings.

G. Awards

1. Faculty Award

The Department of Nursing faculty members select one graduating senior and one graduate student to receive the Faculty Award, presented "in recognition of outstanding ability and exceptional commitment to professional nursing." The award consists of a certificate and the student's name is engraved on a plaque which is permanently displayed in the Department of Nursing.

2. Academic Excellence Award

Presented by the Xi Delta Chapter of Sigma Theta Tau (STT) International Honor Society of Nursing to a graduating senior student and Sigma member, who has demonstrated an exceptional academic record.

3. The DAISY Award for Extraordinary Nursing Students

The *DAISY Award for Extraordinary Nursing Students* is designed to remind students, even on the hardest days in nursing school, why you want to be a nurse. By recognizing nursing students for the above-and-beyond care and compassion shown to patients and their families, we celebrate what it truly means to be a nurse. We honor the nurse-patient *connection* that makes all the difference to patients and their families in their healthcare experience and that makes great nurses truly great.

Academic Support Policy

Seniors:

1. Any senior student may register for the academic support course regardless of academic performance. At the conclusion of spring semester junior year, students who have an average of 75% or below in test grades (this does not include seminar, term paper, etc.) will be **mandated** to register for the academic support course as a co-requisite to continue on to NSG 411/412.
2. Students who do not pass the academic support course and/or do not score proficiently in the RN Comprehensive Predictor Exam will not be approved by the Chair of the Nursing Department to sit for the NCLEX exam. Any student in this situation will be required to repeat this exam.

ACKNOWLEDGEMENT

I have read the West Chester University Department of Nursing Academic Support Policy. I understand that the academic support course must be added to my schedule for the next semester if I do not **receive an average of 75% or above in test grades** (this does not include seminar, term paper, etc.).

Confidential Information Permission

I, _____, hereby give WCU Department of Nursing
(print name)

permission to request my Social Security number for the sole purpose of obtaining access to the patient information system at Chester County Hospital/Penn Medicine in my role as nursing student. I understand that this number is used as a unique identifier and is required for students, faculty, and contractors that will need this level of information systems access. I understand that my social security number and date of birth will not be released to any other organization. The Nursing Department will be forwarding this information in an encrypted password protected Microsoft Excel spreadsheet.

Consent to Release
Pre-requisite Clinical Information to Clinical Agencies

As part of the agreement to have WCU Nursing students at their agency, some of the clinical agencies request that copies of the two step TB screening, vaccinations, and/or criminal and child/elder abuse forms be on file at their agency.

I acknowledge that the above information may be sent to the necessary clinical agencies and agree to the release of that information.

Standards of Safe Clinical Practice

STANDARDS OF SAFE CLINICAL PRACTICE

In all clinical situations, students are expected to demonstrate responsibility and accountability as professional nurses, with the ultimate goal being health promotion and prevention of harm to others. The Department of Nursing believes that this goal will be attained if each student's daily clinical practice is guided by the Standards of Safe Clinical Practice.

Safe clinical performance always includes, but is not limited to, the following behaviors; therefore, I will:

1. Practice within boundaries of the nursing student role.
2. Comply with instructional policies and procedures on implementing nursing care.
3. Prepare for clinical assignments according to course requirements and as determined for specific clinical setting.
4. Provide nursing care that may be required to promote health and prevent illness or further complications.
5. Demonstrate the application of previously learned skills and principles in providing nursing care.
6. Administer medications and/or treatments responsibly according to guidelines provided by the Department of Nursing and agency.
7. Promptly report significant client information in a clear, accurate, and complete oral or written manner to the appropriate person(s).
8. Act with truth/veracity to promptly report incidents (oral or written) of adverse risk(s) for harm to patient, peers, faculty and agencies.

ACKNOWLEDGEMENT

I have read the West Chester University Department of Nursing Academic Standards of Safe Clinical Practice. I understand that these standards are expectations that guide my clinical practice and will be incorporated into the evaluation of my clinical performance in all clinical courses. Failure to meet these standards may result in my removal from the clinical area, which may result in clinical failure.

Substance Abuse Policy

Substance Abuse Policy:

Students are expected to perform unimpaired. Prior to progressing to the nursing courses (NSG 311/312, etc.), a student must have a negative substance abuse result. Students suspected of substance abuse as evidenced by documented impaired behavior are also subject to further testing. This policy is in addition to the West Chester University of PA Student Code of Conduct and the Drug-Free campus policy. (Section III, Ram's Eye View).

Substance Testing:

Students must have a test performed at the designated laboratory during the stated testing period before progressing to each of the following courses: NSG 311/312 and NSG 411/412 (a total of 2 tests). Tests are performed by a qualified agency or laboratory using standard procedures for maintaining chain of custody. Tested substances are: amphetamines, barbiturates, benzodiazepines, cannabinoids, cocaine, opiates and phencyclidine. Students are responsible for all costs associated with these tests. Students' results are sent directly to the Department of Nursing. Students with a positive result will be dismissed from the Nursing major. Refusal to be tested will result in dismissal from the Nursing major.

Drug Testing

I, _____, *understand that as a*
(print name)
requirement for progression in the West Chester University, Department of
Nursing, I must submit to a urine drug test at the designated laboratory, which will
provide the results of the test to the Chairperson of the Department of Nursing. I
understand that if the test is positive, I will be dismissed from the Nursing program.

Guidance for Students Prior to Participation in Clinical Rotations

- (1) West Chester University does not mandate that any student be vaccinated against COVID-19.
- (2) The health care facilities where students complete their clinical requirements (and “affiliation site” or “clinical agency” set their own rules for employees as well as students who work in clinical placements. The decision to require vaccination – along with all other participation requirements – is made by each clinical agency.
- (3) As of the date of this Guidance, the majority of clinical agencies require the COVID-19 vaccination (and in some cases, a booster) to participate in clinical placements within their sites.
- (4) As of the date of this Guidance, most clinical agencies are not considering exemption requests from students, directly or through the placing institutions (that is, West Chester University).
- (5) One clinical agency allows religious or medical exemptions to be considered by WCU.
- (6) No other clinical agencies currently have a process for the consideration of an exemption request. Of the clinical agencies that consider exemption requests, currently all but one review the request directly, and therefore, West Chester University is not involved in the exemption review process.

If a clinical agency is allowing for student exemptions that it will review, the agency’s point of contact information will be posted on the departmental D2L resource page.

- (7) Students enrolled in the nursing curriculum must complete didactic (NSG) and clinical (NSL) courses concurrently in a sequential manner that has been approved by the State Board of Nursing and the specialized accreditation body. Since most clinical agencies are requiring the COVID-19 vaccination, it is very likely that students who are not vaccinated will not be able to complete the curriculum with their cohort (or at all).
 - For example, even if an unvaccinated student completes one rotation at a site that allows for an exemption, the student might not be able to progress within the program (*i.e.*, next rotation) if the agency for their next rotation is requiring the COVID-19 vaccination.
- (8) If there are no clinical agencies who will accept a student who has not received a COVID-19 vaccination or a student’s request for an exemption from a vaccination requirement has been denied, and the student would not be able to continue with their program, WCU will seek to locate an alternative clinical placement. But because WCU cannot control the conditions established by clinical agencies, WCU cannot guarantee clinical placements – in specific clinical rotations required for a Nursing degree – for unvaccinated students. As a result, it may be necessary for a student to pause their nursing curriculum for an undetermined time period.

Department of Nursing

Guidance for Students Prior to Participation in Clinical Rotations

- a. The establishment of new agreements with clinical agencies can take up to six months. In addition, even if WCU would enter into an affiliation agreement with a clinical agency that either does not require students to have a COVID-19 vaccine or it permits exemptions from such a requirement, there is no guarantee that the clinical agency would not change its vaccination requirement in the future. Therefore, West Chester University may not be able to create new affiliation site agreements to allow unvaccinated students to continue in the program.
 - b. Per specialized accreditation standards, students are not permitted to find their own clinical placements.
 - c. Per specialized accreditation standards, students are not permitted to participate in clinical experiences that contain 100% simulation or lab.
- (9) Should a student elect to pursue COVID-19 vaccination, their vaccination records must be updated into the department platform for records by July 1, 2022. This will ensure the Department of Nursing will be able to onboard a student within the clinical agency in time for the Fall semester, preventing a program progression delay.

STUDENT ATTESTATION

By signing this form, you acknowledge all the foregoing conditions, restrictions, and limitations that may be present if you have not received a COVID-19 vaccination.
